

The CSS & HTML 5 Examination A1, B1 & C1 spans three levels to comprehensively evaluate candidates' proficiency. At the entry level, participants showcase foundational knowledge, demonstrating their understanding of HTML and CSS syntax. They are assessed on their ability to grasp core concepts. Progressing to the intermediate level, candidates delve into advanced concepts. This level emphasizes a deeper understanding of HTML and CSS, and the ability to handle more complex scenarios. The advanced level focuses on honing expertise in advanced concepts, showcasing a high level of proficiency suitable for larger, more sophisticated projects in web development.
